# **Gulf War Veterans Information System**

## **Section One**

### **Executive Summary**

#### **Purpose**

The Gulf War Veterans Information System (GWVIS) provides accurate and timely data and information reports identifying the Gulf War service member population and monitoring their compensation and pension benefit utilization.

GWVIS reports are prepared every three months (February, May, August, and November) by the Veterans Benefits Administration's (VBA) Office of Performance Analysis and Integrity (PA&I), Data and Information Services (D&IS).

GWVIS reports do not contain information about individual veterans.

#### **Report Preparation**

D&IS uses the following steps to prepare GWVIS reports.

1. Every three months, the Department of Defense (DoD) sends D&IS an updated list identifying all past and current military service members since August 2, 1990, the start of the Gulf War.
2. The DoD list of service members is compared with VBA compensation and pension benefit information systems.
3. D&IS uses the results from the comparison to prepare reports about Gulf War veterans and their compensation and pension benefit utilization sorted by unique Gulf War cohorts.

#### **History**

In 1997, VA's Office of Policy and Planning, working with VBA, the Veterans Health Administration (VHA), and other VA organizational elements, created GWVIS to identify Gulf War service members and monitor, in part, their compensation and pension benefit utilization.

GWVIS reports are consistent with the "Veterans Health Care Act of 1992" (Public Law 102-585) in identifying Gulf War service members and reporting on various aspects of their benefits claims and related outcomes.

# Gulf War Veterans Information System

D&IS continues to work closely with VA's Office of Policy and Planning to resolve differences in the number of estimated veterans counted in GWVIS and those shown as Gulf War veterans in VetPop2001.

## Notice of GWVIS Changes

- **Prevalence Reports**

Data and Information Services has enhanced the reporting of all Gulf War service-connected conditions. Users of the GWVIS Intranet web site can view detailed reports identifying the prevalence of service-connected conditions by VBA diagnostic code. In addition, users of the web site can export this data to Microsoft Excel spreadsheets.

Please refer to the **GWVIS Reports Description** section at the Intranet web site for details regarding the categories, use, and limitations of these reports. Because of their large size, only a sample of the Prevalence Reports is included.

- **Khamisiyah Data**

The previously reported data related to Khamisiyah have been temporarily removed. The Compensation and Pension Service is in the process of conducting a comprehensive review of the Khamisiyah data. The results should be available in the report of November 2002.

# Gulf War Veterans Information System

## May 2002 GWVIS Summary Report

Category	Conflict	Theater	Deployed	Era	Total
<b>Service Members</b>	696,778	430,680	1,127,458	4,388,819	5,516,277
<b>Estimated Veterans</b>	572,833	278,647	851,480	2,516,737	3,368,217
<b>Claims Filed</b>	206,861	78,431	285,292	714,452	999,744
<b>Claims Processed</b>	183,249	67,955	251,204	663,118	914,322
<b>Claims Granted</b>	159,238	62,264	221,502	587,460	808,962
<b>Claims Denied</b>	24,011	5,691	29,702	75,658	105,360
<b>Claims Pending</b>	23,612	10,476	34,088	51,334	85,422
<b>Undiagnosed Claims Processed</b>	11,783	971	12,754	NA	12,754
<b>Undiagnosed Claims Granted</b>	3,129	147	3,276	NA	3,276
<b>Undiagnosed Claims Denied</b>	8,654	824	9,478	NA	9,478

# **Gulf War Veterans Information System**

## **Section Two**

### **Data Sources**

D&IS uses data from the Departments of Defense (DoD) and Veterans Affairs (VA) to prepare GWWIS reports. The list below identifies the DoD and VA sources used:

DoD's Defense Manpower Data Center (DMDC):

- Active Duty Master File
- Active Duty Loss File
- Reserve Components Common Personnel Data System
- Operation Desert Shield/Storm Files
- Operation Mission/Contingency Files
- Al Jubayl File

VA's Veterans Benefits Administration (VBA):

- Beneficiary Identification Records Locator Subsystem (BIRLS)
- Compensation and Pension Master Record (CPMR)
- Pending Issue File (PIF)

# **Gulf War Veterans Information System**

## **Section Three**

### **Terms and Definitions**

#### **Activated Reservist Separations**

Activated Reservist Separations is a subset of Service Member Separations. Activated Reservist Separations identifies only current and former Reserve and National Guard personnel with a discharge who were called to active duty on or after August 2, 1990.

All Activated Reservists are counted, regardless of:

- Length of enlistment
- Re-enlistment
- Character of service
- Death

#### *Limitations:*

In some cases, DMDC cannot determine if a service member enlisted directly into active duty or if a service member was activated from the Reserves or National Guard. In those cases, the service members are counted under Active Duty Separations.

#### **Active Duty Separations**

Active Duty Separations is a subset of Service Member Separations. Active Duty Separations identifies current and former active duty personnel with a discharge and with service on or after August 2, 1990.

All Active Duty Separations are counted, regardless of:

- Length of enlistment
- Re-enlistment
- Character of service
- Death

#### *Limitations:*

In some cases, DMDC cannot determine if a service member enlisted directly into active duty or if a service member was activated from the Reserves or National Guard. In those cases, the service members are counted under Active Duty Separations.

# **Gulf War Veterans Information System**

## **Claims Denied**

A claim is Denied when VA determines none of the veteran's conditions met eligibility requirements under VA regulations. This denial is called "nonservice-connected" or "NSC."

## **Claims Filed**

Claims Filed equals the total of Claims Granted, Claims Denied, and Claims Pending.

## **Claims Granted**

A veteran's claim is Granted when VA determines at least one of the veteran's conditions meets eligibility requirements under VA regulations. This grant is called "service-connected" or "SC."

Veterans frequently file a claim for more than one condition. For veterans who filed a claim for more than one condition, this category contains veterans with a full grant of all conditions as well as veterans with a combination of grants and denials.

Disabilities are evaluated according to VA regulations, and the extent of the disability is expressed as a percentage from zero percent to 100 percent, in increments of 10 percent. Granted includes all service-connected disabilities, from zero percent to 100 percent, regardless of whether the veteran receives monetary compensation.

## **Claims Pending**

Claims Pending identifies where VA is reviewing a veteran's claim for compensation or pension benefits. This includes appealed and reopened claims.

## **Claims Processed**

Claims Processed equals the total of Claims Granted and Claims Denied. Claims Processed does not include pending claims.

## **Conflict**

Conflict is a subset of Deployed. Conflict identifies active duty service members deployed to Southwest Asia during the 1st year of the Gulf War, from August 2, 1990, through July 31, 1991. This includes Active Duty, Activated Reservists, and National Guard.

# Gulf War Veterans Information System

## *Limitations:*

VA defines the Southwest Asia theater as Iraq, Kuwait, Saudi Arabia, the neutral zone between Iraq and Saudi Arabia, Bahrain, Qatar, the United Arab Emirates, Oman, the Gulf of Aden, the Gulf of Oman, the Persian Gulf, the Arabian Sea, the Red Sea, and the airspace above these locations. However, DoD uses a different and frequently changing definition.

## **Deaths**

Identifies Deaths within the Estimated Veteran population reported to VA by various official sources.

Deaths is a new reporting category as of January 2001.

## *Limitations:*

These counts reflect raw data that has not been subjected to any statistical analysis nor has it been adjusted in any way to make it a mortality study. There has been no adjustment to account for age, gender, race, and other items required for a valid mortality study. In addition, the data will not reflect deaths that occurred after March 2002. The use of these data to draw conclusions regarding mortality rates will result in inaccurate conclusions. For analysis of Gulf War veteran mortality, see "Mortality among US Veterans of the Persian Gulf War: 7-Year Follow-up," Han K. Kang and Tim A. Bullman, *American Journal of Epidemiology*, 2001, 154(5): 399-405.

## **Deployed**

Deployed identifies active duty service members who served at least one day in the Southwest Asia theater of operations from August 2, 1990, through the present. Deployed includes activated Reserve and National Guard. Deployed equals the total of the Conflict and Theater categories.

## *Limitations:*

VA defines the Southwest Asia theater as Iraq, Kuwait, Saudi Arabia, the neutral zone between Iraq and Saudi Arabia, Bahrain, Qatar, the United Arab Emirates, Oman, the Gulf of Aden, the Gulf of Oman, the Persian Gulf, the Arabian Sea, the Red Sea, and the airspace above these locations. However, DoD uses a different and frequently changing definition. In January 2001, a coding error in DoD reporting systems was identified by VBA. As a result, VBA re-coded 10,482 individuals from Gulf War Theater to Gulf War Era.

# Gulf War Veterans Information System

## **Era**

Era identifies service members who did not deploy to the Gulf War. This includes Active Duty, Activated Reserve and National Guard, and Non-activated Reserve and National Guard.

### *Limitations:*

In January 2001, a coding error in DoD reporting systems was identified by VBA. As a result, VBA re-coded 10,482 individuals from Gulf War Theater to Gulf War Era.

## **Estimated Veterans**

Estimated Veterans is a subset of the Service Member population. It identifies individuals with active duty service and a discharge on or after August 2, 1990. Estimated Veterans includes service members called to active duty from the Reserves or National Guard. Subtractions are made for deaths.

### *Limitations:*

As of January 2001, Estimated Veterans includes living Non-activated Reservists and National Guard with a VA service-connected condition or who are in receipt of pension. Subtractions are made for deaths from among those Non-activated Reservists and National Guard who had a VA service-connected condition or who were in receipt of pension.

As of January 2001, Estimated Veterans no longer includes approximately 1.1 million non-activated reservists DMDC incorrectly identified as active duty.

## **Non-Activated Reservist Separations**

Non-activated Reservist Separations is a subset of Service Member Separations. Non-activated Reservist Separations identifies individuals with current and former reserve components service (including National Guard) and a discharge on or after August 2, 1990.

All Non-activated Reservist Separations are counted, regardless of:

- Length of enlistment
- Re-enlistment
- Character of service
- Death

Non-activated Reservist Separations is a new category as of January 2001.

# **Gulf War Veterans Information System**

## **Nonservice-Connected – No Pension**

This category identifies the number of veterans where VA determined none of the veterans' conditions are related to military service. This denial is called nonservice-connected, or "NSC." The veteran does not qualify for a disability pension.

## **Nonservice-Connected – Receiving Pension**

This category identifies the number of veterans where VA determined the veteran's condition(s) were not related to military service. This denial is called nonservice-connected, or "NSC." However, the veteran qualifies for a pension due to a nonservice-connected disability and income qualifications.

## **Service-Connected Ten Percent – No Compensation or Pension**

This category identifies the number of veterans where VA rated at least one service-connected condition at ten percent (10%) or higher. However, the veteran is not in receipt of compensation or pension payments. For example, this category includes service-connected military retiree veterans who are entitled to VA compensation but who elected not to receive it. It also includes veterans with disability severance pay who are on the Temporary Disability Retirement List (TDRL) and the Permanent Disability Retirement List (PDRL).

## **Service-Connected Ten Percent – With Compensation or Pension**

This category identifies the number of veterans where VA rated at least one service-connected condition at ten percent (10%) or higher, and the veteran receives compensation or pension payments.

## **Service-Connected Zero Percent -- With Compensation or Pension**

This category identifies the number of veterans where VA rated at least one service-connected condition at zero percent (0%). The veteran qualifies for pension payments based on disability and income, or the veteran qualifies for compensation based on VA regulations for multiple zero percent conditions.

# **Gulf War Veterans Information System**

## **Service-Connected Zero Percent – No Compensation or Pension**

This category identifies the number of veterans where VA rated at least one service-connected condition at zero percent (0%). However, the veteran does not qualify for compensation or pension payments.

## **Service Members**

Service Members identifies individuals with military service on or after August 2, 1990, the start of the Gulf War.

This includes:

- Army, Navy, Air Force, Marine Corps, and Coast Guard
- Active Duty, Activated Reservists and National Guard, and Non-activated Reservists and National Guard

All Service Members are counted, regardless of:

- Length of enlistment
- Re-enlistment
- Character of service
- Death

VA identifies Service Members because they may be eligible for VA benefits (education, life insurance, home loan guaranty, and compensation and pension) under certain conditions.

### *Limitations:*

In January 2001, Service Members was adjusted to include approximately 800,000 Non-activated Reservists previously unidentified by DMDC.

Individuals in the Public Health Service (PHS) or in the National Oceanic and Atmospheric Administration (NOAA) are not identified or counted as Service Members.

## **Service Member Separations**

Service Member Separations is a subset of Service Members. Service Member Separations identifies individuals with a discharge from military service on or after August 2, 1990.

# Gulf War Veterans Information System

Service Member Separations equals the sum of three categories:

- Active Duty Separations
- Activated Reservist Separations (includes Activated National Guard)
- Non-activated Reservist Separations (includes Non-activated National Guard)

All Service Members Separations are counted, regardless of:

- Length of enlistment
- Re-enlistment
- Character of service
- Death

## Theater

Theater is a subset of Deployed. Theater identifies active duty service members who deployed to Southwest Asia since the 2nd year of the Gulf War, August 1, 1991, until the present. This includes Active Duty as well as Activated Reservists and National Guard. Service members who served in both the Conflict and the Theater time periods are reported only under Conflict.

### *Limitations:*

VA defines the Southwest Asia theater as Iraq, Kuwait, Saudi Arabia, the neutral zone between Iraq and Saudi Arabia, Bahrain, Qatar, the United Arab Emirates, Oman, the Gulf of Aden, the Gulf of Oman, the Persian Gulf, the Arabian Sea, the Red Sea, and the airspace above these locations. However, DoD uses a different and frequently changing definition.

In January 2001, a coding error in DoD reporting systems was identified by VBA. As a result, VBA re-coded 10,482 individuals from Gulf War Theater to Gulf War Era.

## Total

Total equals the sum of the categories Deployed and Era.

## Undiagnosed Claims Denied

An Undiagnosed Claim is Denied when VA determines none of the veteran's undiagnosed conditions met eligibility requirements under VA regulations. This denial is called "nonservice-connected" or "NSC."

# Gulf War Veterans Information System

## *Limitations:*

There may be overlap between Undiagnosed Claims Denied and Claims Granted. This happens when a veteran had all undiagnosed conditions denied and has at least one diagnosed condition granted.

## **Undiagnosed Claims Granted**

A veteran's Undiagnosed Claim is Granted when VA determines at least one of the veteran's undiagnosed conditions meets eligibility requirements under VA regulations. This grant is called "service-connected" or "SC."

This category is a subset of Claims Granted because the veteran has at least one granted condition. There are 35 different types of undiagnosed conditions under VA regulations, and Gulf War veterans frequently claim more than one undiagnosed condition.

For veterans who filed a claim for more than one undiagnosed condition, this category contains veterans with a full grant of all undiagnosed conditions as well as veterans with a combination of grants and denials for undiagnosed conditions.

Disabilities are evaluated according to VA regulations, and the extent of the disability is expressed as a percentage from zero percent to 100 percent, in increments of 10 percent. Undiagnosed Claims Granted includes all service-connected undiagnosed disabilities, from zero percent to 100 percent, regardless if the veteran receives compensation.

## **Undiagnosed Nonservice-Connected – Receiving Compensation or Pension**

This category identifies the number of veterans where VA determined the veteran's undiagnosed condition(s) did not meet VA regulations. This denial is called nonservice-connected, or "NSC."

However, the veteran qualified for a pension due to disability and low income, or the veteran was granted service-connection for a diagnosed condition.

## *Limitations:*

There may be overlap between the category Undiagnosed Nonservice-connected Receiving Compensation or Pension and the category Claims Granted. This happens when a veteran had all undiagnosed conditions denied and has at least one diagnosed condition granted.

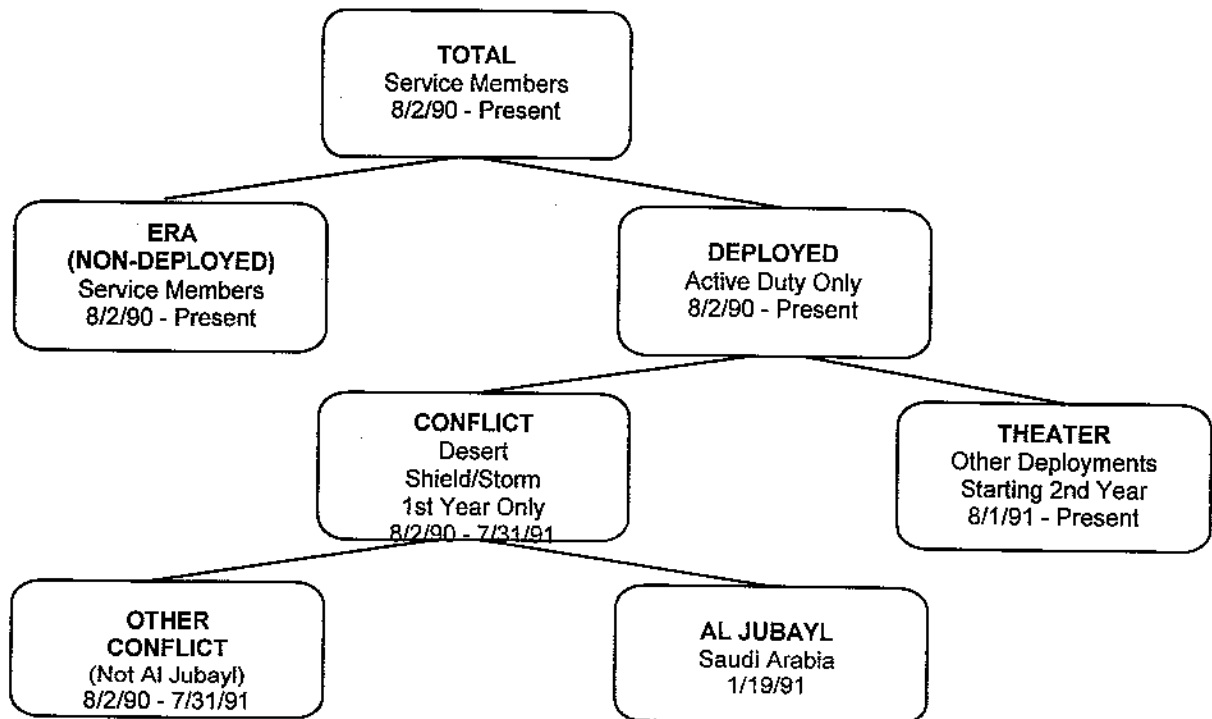

# Gulf War Veterans Information System

## Section Four

### Report Categories

GWVIS reports are prepared for all categories shown below except "Other Conflict." The category "Other Conflict" identifies a subset of Conflict service members not located at or near Al Jubayl.

- "Total" equals the sum of "Era" (Non Deployed) and "Deployed"
- "Deployed" equals the sum of "Conflict" and "Theater"
- "Conflict" equals the sum of "Other Conflict" and "Al Jubayl"

## Gulf War Service Member Statistics May 2002

Category	Conflict	Theater	Deployed	Era	Total
<b>Service Members</b>	696,778	430,680	1,127,458	4,388,819	5,516,277
<b>Service Member Separations</b>	580,846	280,958	861,804	3,584,732	4,446,536
<b>Active Duty Separations</b>	466,471	276,859	743,330	2,226,283	2,969,613
<b>Activated Reservist Separations</b>	114,375	4,099	118,474	241,163	359,637
<b>Non-activated Reservist Separations<sup>1</sup></b>	NA	NA	NA	1,117,286	1,117,286
<b>Deaths<sup>2</sup></b>	8,013	2,311	10,324	30,423	40,747
<b>Estimated Veterans</b>	572,833	278,647	851,480	2,516,737	3,368,217

<sup>1</sup> D&IS identified 85,607 Non-Activated Reservists who are service-connected or pensioners as "veterans." D&IS identified 5,893 deaths among the 85,607. The 5,893 deaths are included in the count for Deaths reported under "Era." The 79,714 remaining living veterans are included in the count of "Estimated Veterans" reported under "Era." There are 24,530 deaths from "Active Duty Separations" and "Activated Reservist Separations" included in the count of "Estimated Veterans" reported under "Era." D&IS does not consider deaths among "Non-activated Reservist Separations" as part of the calculation for "Estimated Veterans" because these service members are not veterans.

<sup>2</sup> These counts reflect raw data that has not been subjected to any statistical analysis nor has it been adjusted in any way to make it a mortality study. There has been no adjustment to account for age, gender, race, and other items required for a valid mortality study. In addition, the data will not reflect deaths that occurred after March 2002. The use of these data to draw conclusions regarding mortality rates will result in inaccurate conclusions. For analysis of Gulf War veteran mortality, see "Mortality among US Veterans of the Persian Gulf War: 7-Year Follow-up," Han K. Kang and Tim A. Bullman, American Journal of Epidemiology, 2001, 154(5): 399-405.
